

Associate, Risk Advisory & Analytics

FULL-TIME POSITION

Leaf

Associate, Risk Advisory & Analytics

Leaf

Become the most knowledgeable advisor in the insurance industry with help from data and Artificial Intelligence.

At Leaf, a Danish Insurtech company, we're redefining the role of insurance companies and brokers. Our mission is to reshape the insurance market by empowering customers with transparent, data-driven insights that help them make smarter and more informed decisions.

Our platform integrates directly with business data and other sources, giving real-time insights into millions of data points. We use this to i) improve coverage for our customers, ii) provide proactive advisory services and iii) expand our service offerings far beyond traditional risk management.

Since launching in October 2023, we've onboarded over 500 Danish companies and industry associations, with 20-30 new monthly joiners.

Our tight-knit and diverse team includes economists, developers, lawyers, and brokers, fostering a curious, analytical, and innovative culture. Backed by Innovation Fund Denmark and external capital, we're aiming to become an international market leader and transforming the industry.

The Position

You'll join our core team in risk assessment, portfolio management and claims advisory. You will also be working closely with our developers and account managers to further develop our models and platform to strengthen our offerings. Responsibilities include:

- Conducting risk assessment using our proprietary platform, leveraging the newest technology, artificial intelligence and millions of data points
- Communicating with insurance carriers and strategic partners
- Managing customer portfolios and collaborating with our support team
- Working with our development department to support our offering (AI and data discovery, real-time notifications, benchmark database etc.)
- Solving complex problems and playing a leading role in developing our culture service offerings
- Playing a key role in transitioning Leaf from a scale-up to a market leader

Ideal Candidate

We welcome all applicants, but you'll stand out if you:

- Have a degree in business, economics, law or related fields
- Bring 1-2 years of experience in roles like underwriting, analysis or claims handling
- Are proactive, structured and enjoy interdisciplinary work
- Communicate well with customers and strategic partners

What we offer

Join a small, dynamic team and take on significant responsibility early in your career. You will be mentored by experts across insurance, law, AI and advanced analytics, and have access to IDD courses at the Insurance Academy to ensure your professional growth. Based in Copenhagen Fintech Lab, you'll also participate in workshops, seminars and networking events with industry leaders.

On a personal level, we want to create an inclusive and collaborative culture, with a flexible work schedule, stock options and vast opportunities for growth and taking on leadership roles.
